SPEA Open Ended Questions

What did you like most about this course and instructor?

Comments
I enjoyed the problem sets and applicability of class examples to homework assignments.
My instructor is willing to help with my homework question and any additional questions I have during the class.
Provide lots of help. Friendly. Patient.
Activities that help understand the topics
Ms. Zhang always prepared well for this class. She could answer every questions in class. Also, she is patient and nice to her students. Highly recommend!
She is a really nice person and explains the concepts clearly.
_
The homework is really helpful to understand the class
I love the way she teaches, and how she cares if students fully understand the materials.
I liked the in class exercises. Those helped a lot

What did you like least about this course and instructor?

Comments
Lectures were sometimes dry, but that is also just a part of learning Excel.
Nothing

How dry the information is. Some days there was too much lecture when we could have been working on the computers.

Do you have additional comments and/or suggestions to offer the instructor for the next time s/he teaches this course?

Comments
More regular reading quizzes would help keep students more accountable with regards to the textbook and readings.
Class time can be more efficient.
More videos, and real life examples
At the beginning of the class, since I'm not that familiar with the program, sometimes it is relatively difficult for me to catch up with the instructor. So when the instructor is demonstrating the slides or Excel, I recommend the professor let the TA to do the same thing on the side.

NO
This class and the material were impossible and I do not feel like what is taught in the course is applicable for real situation. While the problems in the book represent real situations/problems I know I would find myself having in the real world, the ways we solved them were not realistic. K201, also teaches excel and access, is a class that even though I took it freshman year I still use and will continue to use what I learned in the real world . I will not remember anything from this class as it was just memorizing how to do formulas the way the instructor wanted so the problem was correct but I didn't learn anything
You have done excellent job!
Don't pass around a ball to choose a person to be it. That is something that happens in kindergarten.
